

Underwriting process automation for M&A insurance

CLIENT

The client is a commercial insurance leader in North America.

BUSINESS CONTEXT

A leading commercial insurer needed to reduce the deal processing time by automating the retrieval of specific information from various documents. This was expected to boost conversions.

BUSINESS IMPACT

50%+ Reduction in deal processing time

SOLUTION DEPLOYMENT

BRIDGEi2i extensively used Computer Vision (CV), Optical Character Recognition (OCR) & Natural language processing (NLP) to extract information from voluminous data and built an interactive platform for delivering deal-level insights.

BRIDGEi2i developed an AI solution for underwriters to speed up the deal-closing process. The solution allows users to upload all the documents submitted by clients, and generates deal-level insights to evaluate their risk profiles. The tool can handle various financial documents such as bank statements, tax sheets, share purchase documents, and broker deals. The system automatically identifies key attributes and related information using named-entity recognition through advanced NLP techniques.

BRIDGEi2i developed a custom-built web application to integrate all stages of the underwriting process.
